PROFILS

As a skilled web developer with 4 years of experience, I specialise in using a variety of tools and technologies to build responsive and dynamic web applications. My expertise includes working with Gulp JS, Git Hub, Angular, Sass, JavaScript, HTML 5, CSS 3, Bootstrap 4, and JQuery. Throughout my career, I have worked on a wide range of projects, from small-scale websites to complex web applications. In addition to my technical skills, I am a dedicated team player and enjoy collaborating with other developers, designers, and stakeholders to deliver exceptional results. I am constantly seeking to expand my skill set and stay up-to-date with the latest technologies to provide the best possible solutions to clients.

EDUCATION

(April 2015-May-2018)
B.C.A From P.D.Pandya College,Ahmedabad.

(May 2018-December 2018)
Graphic and Web Designing Course from Arena Animation Maninagar, Ahmedabad.

JOB DESCRIPTION

Amura Marketing Technologies (Present)

NPAV   Land Global   Natural Remedies Human Health

- As a web developer, I have experience working with a variety of tools and methodologies, including Gulp JS, Git Hub, Sass, JavaScript, HTML 5, and the Agile SCRUM methodology. I am excited to apply these skills to the NPAV, Land Global, and Natural Remedies Human Health projects.

- My role in these projects would be to develop the front-end of the web applications to create responsive and visually appealing user interfaces. I understand that the NPAV project requires a dark and light theme for the user interface, and I am confident that I can create a design that meets the client's requirements.

- In addition to my technical skills, my experience with Agile SCRUM methodology would enable me to work efficiently with the rest of the development team. This would involve participating in regular stand-up meetings, contributing to sprint planning and reviews, and communicating effectively with other team members to ensure that the projects are completed on time and to the highest standards.

- Overall, my role in the NPAV, Land Global, and Natural Remedies Human Health projects would be to create user-friendly and visually appealing front-ends for the web applications that meet or exceed client expectations. I would work collaboratively with the rest of the development team to ensure that the projects are delivered on time and to the highest standards of quality.

X-Byte Enterprise Solutions (2..1 Years)

AutoCrit

- Implemented project using Agile SCRUM methodology. Involved in daily stand-up meetings, sprint showcase, and sprint retrospective.

- Used Angular as a framework to create a Single Page Application (SPA) that can bind data to specific views and synchronize data with the server using Sass, Bootstrap, Angular.

- Used client-side scripting languages such as Angular 9,10, JavaScript, and JQuery.

- Worked with CSS3 and Bootstrap to create responsive web designs for multiple departments/pages.

- UI development with technologies like HTML 5, Angular, and Javascript.

- Designed CSS3 based web pages that were cross-browser compatible.

- Used Angular, angular material as a framework for building web apps.

- Performed Client-side validation using JavaScript. API Implementation for Application
